F.No. DPCC/5(9)/CT/2011/ 3300

Date:- 24/9/25

CIRCULAR

It has been observed that plastic bottles are being used by employees of the Delhi Pollution Control Committee (DPCC) as water bottles in their daily office routine. As the nodal agency for Pollution Control in Delhi, it is the responsibility of all DPCC employees to lead by example in reducing pollution and promoting sustainable practices.

In this regard, all employees are hereby requested to **discourage and stop the use of plastic bottles** within the office premises with immediate effect.

Plastic waste, especially single-use plastic bottles, significantly contributes to environmental pollution and poses a threat to public health. Hence, instead of plastic bottles, all employees are encouraged to use environmentally friendly alternatives such as **metal, bamboo, glass, or other sustainable water bottles**.

This step is essential not only to reduce plastic waste but also to reinforce our commitment to environmental protection and sustainable living.

Your cooperation and support in this important initiative are highly appreciated.

Pawan Kumar Jayant
Administrative Officer
