**M/s Delhi State Industrial & Infrastructure Development Corp. Ltd.,
(A Government Undertaking)
Office of the Executive Engineer (CD-XIX)
Administrative Block Building, Narela Industrial Park
Delhi-110040**

Sub: Construction of Industrial Workers housing with cost effective technologies at Narela Industrial Park of DSIIDC - Environmental Clearance – Regd.

This has reference to communication no. DSIIDC/EE(CD-VII)/L.C.H-Narela/Exec./07/F.228 dated 31.05.2007 to Ministry of Environment Forests followed by subsequent letter received on 30.01.2009, 19.02.2009, 27.07.2009, 30.9.2009 and 21.10.2009 to State Level Expert Appraisal Committee, NCT-Delhi, constituted vide GOI notification no. S.O. 1888(E) dated 30.07.2008, seeking prior Environmental Clearance for the above project under EIA Notification, 2006. The proposal has been appraised as per prescribed procedure in the light of provisions under EIA Notification, 2006 on the basis of mandatory documents enclosed with the application along with the additional clarifications furnished in response to the observations of State Expert Appraisal Committee constituted by Competent Authority in its meetings held on 29.12.2008, 30.01.2009, 20.02.2009, 07.08.2009, 09.10.2009, 06.11.2009 and 07.12.2009.

1. It is interalia noted that the proposal is for grant of Environmental Clearance of already under Construction Industrial Workers housing with cost effective technologies at Narela Industrial Park of DSIIDC on a plot of 55077.65 sq.mt having 1892 residential units (1184 are of G+3 and 708 are of G+2). Population density in the housing units is estimated upto 1243 persons/ ha. The ground coverage is 16726.32 Sq.mt. Proposed F.A.R. is 61904.04 Sq.mt. Area for green belt development is 9747.86 Sq.mt. Area for Parking proposed is about 4492.03 Sq.mt., which is for 35 cars and 972 scooters/cycles. Total water requirement during operation phase will be 925 KLD, which will be provided by DJB. Wastewater generation during operation phase from domestic usage will be 740 KLD. Wastewater will be treated through STP having 750 KLD capacity and treated wastewater will be used in green belt development. The total solid waste generation will be 2733.6 Kg/day. The total power requirement

for the proposed project is 2545 KVA, which will be provided by NDPL. One D.G Set of 30 KVA capacity will be provided for power backup. Four rainwater collecting pits will be provided at the site. The total cost of the project is Rs. 4425.06 Lakhs. SEIAA has not examined their requirements as the same has been taken into account by SEAC during the appraisal of project.

2. The State Expert Appraisal Committee, after due consideration of the relevant documents submitted by the project proponent and additional clarifications furnished in response to the observations, has recommended this project to State Environmental Impact Assessment Authority (SEIAA) for grant of Environmental Clearance. After considering different aspects and SEAC recommendations, SEIAA hereby accords necessary Environmental Clearance for the above project as per provisions of Environment Impact Assessment Notification, 2006 and its subsequent amendments, subject to compliance of the terms and conditions as follows:

PART A- SPECIFIC CONDITIONS

I. Construction Phase

- (i) Construction to be started after Consent to Establish has been obtained from Delhi Pollution Control Committee under Air and Water Act and a copy shall be submitted to the SEAC- NCT Delhi, failing which project shall be discontinued.
- (ii) Under the provisions of Environment (Protection) Act, 1986, legal action shall be initiated against the project proponent since the construction of the project has been started without obtaining environmental clearance and for each violation of the requirements shown below.
- (iii) A first aid room to be provided in the project both during construction and operation phase.
- (iv) Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. the housing may be in the form of temporary structures to be removed after completion of the project.
- (v) Topsoil excavated during construction activities should be stored for horticulture/landscape development within site.
- (vi) Disposal of muck during construction phase should not create any adverse effect on the neighbouring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
- (vii) Proper measures should be adopted to control dust emissions during construction phase.
- (viii) Soil and water samples of the site should be tested by the proponent through DPCC recognized laboratory to ascertain that there is no

threat to ground water quality by leaching of heavy metals and other toxic contaminants, on a six monthly basis for inclusion in the six monthly report.

- (ix) Construction spoils, including bituminous material and other hazardous materials, must not be allowed to contaminate watercourses and the dump sites for such material must be secured so that they should not leach into the ground water.
- (x) Any hazardous waste generated during construction and operation phase should be disposed off as per applicable rules and norms with necessary approvals to the Delhi Pollution Control Committee.
- (xi) The diesel generator sets to be used during construction phase should be low sulphur diesel type and should conform to Environment Protection Rules prescribed for air and noise emission standards.
- (xii) The diesel required for operating DG sets shall be stored in underground tanks and if required, clearance from Chief Controller of Explosives shall be taken.
- (xiii) Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards and should be operated only during non-peak hours. The material loaded or unloaded should be covered (especially excavated soil) before transportation to avoid fugitive emissions etc.
- (xiv) Ambient noise levels should conform to prescribed residential standards both during day and night. Adequate measures should be made to reduce ambient air and noise level during construction and operation phase, so as to conform to the norms stipulated by CPCB/DPCC.
- (xv) Extensive plantation should be provided not only in the Housing Complex but also in the industrial area. 30m-50m wide greenbelt should be provided all around the housing complex and industrial area.
- (xvi) Fly ash should be used as building material in the construction as per the provisions of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003.
- (xvii) Ready Mix Concrete must be used in building construction.
- (xviii) Rain water harvesting for roof top run-off and surface run-off, as plan submitted should be implemented. Before recharging the surface run-off, pre-treatment must be done to remove suspended matter, oil and grease. The depth of the bore for rainwater recharging should be kept in consultation with DJB. No wastewater (such as sewage, trade effluent, backwash of treatment unit, floor washing wastewater etc) should be discharged into the rain water harvesting structure in order to avoid groundwater contamination.
- (xix) Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices preferred.
- (xx) Energy Conservation Building Code to be strictly adopted in all aspects of building design and construction.
- (xxi) Approval of competent authority shall be obtained for structural safety of the building due to earthquake, adequacy for fire fighting

- equipments etc as per national Building Code including protection measures from lightening etc.
- (xxii) Regular supervision of the above and other measures for monitoring should be in place all through the construction phase, so as to avoid disturbance to all surroundings.

II. Operation Phase

- (i) Consent to Operate shall be obtained from DPCC before operation, failing which the Environmental Clearance herein shall be deemed to be withdrawn.
- (ii) The Zero discharge wastewater condition to be achieved with installation of on-site Sewage Treatment Plant. The STP should be certified by an independent expert and adequacy report in this regard should be submitted to Delhi Pollution Control Committee before the project is commissioned for operation. Necessary measures should be made to mitigate the odour problem from STP.
- (iii) The solid waste (dry as well as wet garbage) generated should be properly collected and segregated. Organic Waste Converter shall be installed for the treatment of biodegradable (wet) garbage generated within the housing complex. Non-Biodegradable waste should be outsourced properly after recovery of recyclable material. Adequate measures should be taken to prevent odour problem.
- (iv) Utilization of Diesel power generating sets is subject to power failure condition only. The DG sets proposed as a source of power back up during operation phase should be of enclosed type, low sulphur diesel run and conform to rules made under the Environment (Protection) Act, 1986. The DG sets should be subjected to periodic noise and stack monitoring in consultation with DPCC. Waste/used diesel should be stored and managed as per Hazardous Waste (Management and Handling) Rules, 2000 as amended to date and be sold to CPCB approved recyclers.
- (v) The ground water drawl from existing/proposed bore wells should be done only with the prior permission of DJB. Water supply through tanker is not permitted during operation phase.
- (vi) Traffic congestion near the entry and exit points from the roads adjoining the project site must be avoided. Parking should be fully internalized and no public space should be utilized.
- (vii) Energy Conservation measures such as solar lighting for common area, solar water heating system, CFLs/TFLs for lighting of areas, LED lights for signage, solar inverters etc should be adopted.
- (viii) Used CFLs/TFLs should be properly collected and disposed off/ sent for recycling as per the prevailing guidelines/rules of the regulatory authority to avoid mercury contamination.
- (ix) A Report on energy conservation measures conforming to energy conservation norms finalized by Bureau of energy Efficiency should be prepared incorporating details about building materials and technology, R & U factors etc and submit to the State Expert Appraisal Committee and a copy to DPCC in three months time.

PART B- GENERAL CONDITIONS

- (i) The environment safeguards and monitoring schedule as contained in the Environment Management Plan should be implemented in letter and spirit & there will be no departure from the final project proposal as approval herein.
- (ii) Officials from Ministry of Environment & Forests, Regional Office, Chandigarh and Delhi Pollution Control Committee, who would be monitoring the implementation of environmental safeguards, should be given full cooperation, facilities and documents/data on site by the project proponents during their site inspection. A complete set of all the documents submitted to SEAC should be forwarded to Ministry of Environment & Forests, Regional Office, Chandigarh & DPCC. Six monthly monitoring reports should also be submitted to Ministry of Environment & Forests, Regional Office, Chandigarh & DPCC.
- (iii) In the case of any change(s) in the scope of the project, the project would require a fresh appraisal by the SEAC.
- (iv) In compliance to Hon'ble High Court's Order dated 7th August, 2008, use and sale of plastic carry bags should be prohibited.
- (v) E-waste generated in the complex should be managed as per CPCB guidelines on E-waste management.
- (vi) State Environmental Impact Assessment Authority reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including the revoking of the environmental clearance under the provisions of the Environmental (Protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.
- (vii) All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department etc shall be obtained, as applicable by project proponents from the respective competent authorities.
- (viii) These stipulations would be enforced among others under the provisions of Water (Prevention and Control) Pollution Act, 1974, the Air (Prevention and Control) Act 1981, the Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and EIA Notification, 2006 as amended to date.
- (ix) The project proponent should prominently advertise in at least two local Newspapers widely circulated in the region indicating that the project has been accorded Environmental Clearance and copy of clearance is available with the DPCC and may also be seen on the website of DPCC at <http://www.dpcc.delhigovt@nic.in>. The advertisement should be made within 10 days from the date of receipt of the Clearance letter.
- (x) The project proponent should submit copy of Environmental Clearance to the Heads of Local bodies, Panchayats and Municipal bodies in addition to relevant offices of Government who in turn has to display the same for 30 days from the date of receipt.
- (xi) An appeal against this Environmental Clearance shall lie with the National Environment Appellate Authority, if preferred, within a period

- of 30 days as prescribed under Section 11 of the National Environment Appellate Act, 1997.
- (xii) Status of compliance to the various stipulated environmental conditions and environmental safeguards will be uploaded by the project proponent in its website.
