

Environmental Protection Act 1986, the Public Liability Insurance Act 1991 and the Insurance Act 2003.

- 410 The project proponent should prominently advertise in at least two local newspapers widely circulated in the region indicating that the project has been selected Environmental Clearance and that its clearance is available with the (MOE) and may play its role on the website of (EPIC) at <http://www.epic.delhi.nic.in>. The advertisement should be made within 10 days from the date of receipt of the clearance order.
- 411 The project proponent should submit copy of Environmental Clearance to the heads of local bodies, Panchayats and Panchayat samitis in addition to relevant officers of Government also in order to create thereby the sense of involvement from the local populace.
- 412 An appeal against the Environmental Clearance shall be with the National Environmental Appeals Authority. It shall be within a period of 30 days as prescribed under Section 11 of the National Environmental Act, 1987.
- 413 Status of compliance to the various regulatory environmental conditions and environmental compensation will be monitored by the project proponent in its website.

Dr. A. K. Jaisankar
Member Secretary (MOE)

Annex:

1. The Environmental Clearance Order Circular (EPIC) Department of Government, Government of India, Secretariat Building, 8th Floor, Coning, 1st Block, New Delhi.
2. An Appeal Page, MO (Public) Chapter, Date and Environmental Impact Assessment Authority, 1-6th, Anna Nagar City, Madras House, Anna Park, Chennai-600 029.
3. The Appeal Appeal Response- An Order, Ministry of Environment & Forest, New Delhi (MOEF) Circular, Letter No. 1/1999.
4. The Appeal Response/Response of Forest, Ministry of Environment & Forest, New Delhi (MOEF) Page No. 1/1999, Section 11 & Section 10, Hyderabad: 1999.

Dr. A. K. Jaisankar
Member Secretary (MOE)

- 135 The design guidelines only do so with some exceptions where decisions are not solely based upon such design criteria & considerations. Therefore, these guidelines are not prescriptive documents. A design team might prefer to add more or variations to the rules.
- 136 The design objectives & approach for the city shall be based on engineering studies and it should consider that that benefits it throughout the project.
- 137 Whereas there is ongoing construction related to the city including its transportation and transit facilities, whether such facilities and projects require it, regardless of the type, design standards are applied as specified and, being complete items, the design team is required to follow the standard approach, including and without exception to any other standards.
- 138 Where it may arise that a reference to specified standard is made that is not applicable and such standard is not applicable, it shall be noted as such and not used for compliance with guidelines. As an exception to the rule, standards identified as "optional", where it may not be being applied or it is to be applied and such standards are not used as an existing rule.
- 139 These guidelines do not conflict with any other, in use and existing, standards and guidelines and it is the purpose of these standards and guidelines to be used.
- 140 These are not to be used as a design guide or engineering guide or as a design standard. Therefore, the design team is not required to follow any rule that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable. The design team is not required to follow any design standard that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable.
- 141 The guidelines are not to be used as a design guide or engineering guide or as a design standard. Therefore, the design team is not required to follow any rule that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable.
- 142 These guidelines are not to be used as a design guide or engineering guide or as a design standard. Therefore, the design team is not required to follow any rule that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable.
- 143 These guidelines are not to be used as a design guide or engineering guide or as a design standard. Therefore, the design team is not required to follow any rule that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable.
- 144 These guidelines are not to be used as a design guide or engineering guide or as a design standard. Therefore, the design team is not required to follow any rule that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable.
- 145 These guidelines are not to be used as a design guide or engineering guide or as a design standard. Therefore, the design team is not required to follow any rule that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable.
- 146 These guidelines are not to be used as a design guide or engineering guide or as a design standard. Therefore, the design team is not required to follow any rule that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable.

6. General Notes

- 6.1 These guidelines are not to be used as a design guide or engineering guide or as a design standard. Therefore, the design team is not required to follow any rule that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable.
- 6.2 These guidelines are not to be used as a design guide or engineering guide or as a design standard. Therefore, the design team is not required to follow any rule that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable.
- 6.3 These guidelines are not to be used as a design guide or engineering guide or as a design standard. Therefore, the design team is not required to follow any rule that is not applicable, which is, which are not applicable and it should be understood that, following the guidelines, the design team is not required to follow any design standard that is not applicable.
