Delhi Pollution Control Committee
Dairy No. 33120
12 MAR 2019
Sign. of Receiving Officer

Subject: Expansion of "Hotel Complex & Convention Centre" at Asset No. 13, Hospitality District, DIAL IGI Airport, Delhi by M/s Bamboo Hotel & Global Centre (Delhi) Private Limited - Environmental Clearance - reg.

Sir,

This has reference to your online proposal No. IA/DL/NCP/61386/2016 dated 5th July, 2018, submitted to this Ministry for grant of Environmental Clearance (EC) in terms of the provisions of the Environment Impact Assessment (EIA) Notification, 2006 under the Environment (Protection) Act, 1986.

2. The proposal for grant of environmental clearance to the project 'Expansion of Hotel Complex & Convention Centre' at Asset No. 13, Hospitality District, DIAL IGI Airport, Delhi by M/s Bamboo Hotel & Global Centre (Delhi) Private Limited, was considered by the Expert Appraisal Committee (Infra-2) in its 33rd meeting held on 9-10 August, 2018. The details of the project, as per the documents submitted by the project proponent, and also as informed during the above meeting are as under:-

(i) The project will be located at Latitude 28°32'58.74" N and Longitude 77°7'16.32" E.

(ii) The proposed project is Expansion in Environment Clearance of Hotel Complex & Convention Centre at Asset No. 13, Hospitality District, DIAL IGI Airport, Delhi. The project includes Hotel and Convention Centre for which Environmental Clearance has already been obtained from SEIAA, Delhi vide letter No. 92/DPCC/SEIAA-SEAC/10/1444 dated 11.11.2010. Later, amendment in Environmental Clearance was also obtained vide F.No. SEIAA-D/C-326/EC-335/2016 dated 10.11.2016 for plot area of 31,163.13 sqm and built up area of 2,12,732.72 sqm. Some construction has been done as per earlier Environment Clearance but now the construction at the site has been stopped. Due to change in planning the built-up area of the project has increased from 2,12,732.72 sqm to 3,51,081.49 sqm. The total plot area is remain 31,163.13 sqm. The details are as follows:

Details	As per Amendment in Environmental Clearance	Addition	After Expansion	Impact
Total Plot area	31163.13 sqm	-	31163.13 sqm	No change
Ground coverage permissible	22275 sqm	-	22275 sqm	No change

Ground coverage Achieved	21410.35 sqm	-	21410.35 sqm	No change
FAR (permissible)	111483.6 sqm	-	111483.6 sqm	No Change
FAR(Achieved)	70982.72 sqm	40248.64 sqm	111231.36 sqm	Increase
Non-FAR Area (including Basement)	141750 sqm	12353.24 sqm	154103.24 sqm	Increase
Built-up Area (FAR + NON-FAR)	2,12,732.72 sqm	1,38,348.77 sqm	3,51,081.49 sqm	Increase
Green Area	8102.49 sqm (26%)	-	8102.49 sqm (26%)	No change
No. of Floors	Mezzanine + G + 4	-	Mezzanine + G + 8	Increase
No. of Tower/Block	2	-	2	No change
No. of Basement	6	-	6	No change
Height of Building	15 m	21.72m	36.72 m	Increase
Activity:				
No. of Guest Room	150	1020	1170	Increase
Restaurants	2	2	4	Increase
Banquet	1	2	3	Increase
Offices	20	-	12 + 2	Decrease
Total Power Load	6000 KVA	24000 KVA	30000 KVA	Increase
No. of DG/GG sets	3 x 2000 KVA	-	14 x 2000 KVA	Increase
No. of Rainwater collecting Tank	2	-	2	No change
Parking required	1623 ECS	-	1623 ECS	No change
Parking proposed	2168 ECS	-	2168 ECS	No change
Water requirement	374 KLD	811 KLD	1185 KLD	Increase
STP capacity	310 KLD	1010 KLD	1320 KLD	Increase
Solid waste generated	3105 kg/day	1433 kg/day	4538 kg/day	Increase

- (iii) Standard ToR for the same has also been granted vide F.No 21-35/2017-IA-III dated 06.03.2017.
- (iv) During the construction of the proposed project, the water will be supplied from treated water of nearby STP of the complex and the same will be maintained without any adverse impact on the environment. Drinking water will be provided with drinking water tanker supply. Temporary sanitary toilets will be provided during peak labor force.
- (v) The total water requirement will be 1185 KLD out of which fresh water requirement is 552 KLD. The source of water is Delhi International Airport Limited (DIAL). The total waste water generation will be 666 KLD. The waste water shall be treated through Sewage Treatment Plant (STP) having capacity 1320 KLD. 633 KLD treated water will be reused in flushing, gardening, D.G. Cooling. 2 No. of RWH tanks will be provided.
- (vi) About 4538 Kg/day Municipal solid waste will be generated from the project after revision. The biodegradable waste will be 3177 Kg/ day and recyclable waste of 1361 kg/day will be handed over to authorized recycler.
- (vii) Used Oil of 196 lit/month shall be collected in leak proof containers at isolated place and then it will be given to approved recycler. E- Waste of 2 kg/month will be collected and given to approved recycler.
- (viii) The total power requirement will be 30,000 KVA which is provided by DIAL. D.G. Set of capacity 14x2000 KVA shall be installed in acoustically enclosure

with anti-vibration pads and shall be used during Power failure only. Wet scrubber will be installed with DG sets.

- (ix) 2 no. of Rain water collection tanks has been proposed.
- (x) Parking Provision is 2168 ECS shall be made after expansion.
- (xi) No eco-sensitive area lies within 10 km radius. Asola wild life Sanctuary- 14.73 Km SE
- (xii) There is no court case pending against the project.
- (xiii) Cost of the project is Rs. 1800 Crores.
- (xiv) Employment potential: Labourers during construction phase 150 no. and about 2782 no. of staff during operation phase.
- (xv) Benefits of the project: The proposed complex will have Hotel Complex and Convention Centre. It will increase infrastructure of the area & will provide better environment and will increase the livelihood of the people. It will provide healthy, green & safe premises for living. People have more open and green spaces, bringing them closer to nature. The benefits relate to the direct employment associated during the construction of the infrastructure as well as during operation in the hotel and convention centre. Additional employment opportunities will lead to a rise in the income and improve their standard of living. Corporate Environment Responsibility will also be considered for the social benefits of the society.

3. The project/activity is covered under category 'B' of item 8(b) 'Township and Area Development Projects' of the Schedule to the EIA Notification, 2006 and its subsequent amendments, and requires appraisal at State level. However, due to absence of SEIAA/SEAC in Delhi, the proposal is appraised at Central Level.

4. The proposal was considered by EAC (Infra-2) in its 33rd meeting held on 9-10 August, 2018. During deliberation the committee was informed that an emission modeling for D.G. sets has been performed and that there has been no construction since November, 2017 when the E.C. Expired. The EAC deliberated on the certified compliance report letter F. No. IV-ENV/DLI/1930/2010 dated 04.07.2018 issued by the MoEF&CC's Regional Office (CR), Lucknow.

5. The EAC, based on the information submitted and clarifications provided by the Project Proponent and detailed discussions held on all the issues, recommended for grant of Environmental Clearance to the project. As per recommendations of the EAC, the Ministry of Environment, Forest and Climate Change hereby accords Environmental Clearance to the project 'Expansion of Hotel Complex & Convention Centre' at Asset No. 13, Hospitality District, DIAL IGI Airport, Delhi by M/s Bamboo Hotel & Global Centre (Delhi) Private Limited, under the provisions of the EIA Notification, 2006 and amendments/circulars issued thereon, and subject to the specific and general conditions as under:-

PART A – SPECIFIC CONDITIONS:

- (i) Consent to Establish/Operate for the project shall be obtained from the State Pollution Control Board as required under the Air (Prevention and Control of Pollution) Act, 1981 and the Water (Prevention and Control of Pollution) Act, 1974.

- (ii) The approval of the Competent Authority shall be obtained for structural safety of buildings due to earthquakes, adequacy of firefighting equipment etc as per National Building Code including protection measures from lightening etc.
- (iii) The project proponent shall provide for adequate fire safety measures and equipment as per National Building Code/required by Fire Service Act of the State and instructions issued by the local Authority/Directorate of fire, from time to time. Further, the project proponent shall take necessary permission/NOC regarding fire safety from Competent Authority as required.
- (iv) The project proponent shall obtain all necessary clearance/ permission from all relevant agencies including town planning authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.

Topography and natural Drainage

- (v) The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape, and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water. Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done.

Water requirement, Conservation, rain water Harvesting, and Ground Water Recharge

- (vi) As proposed, fresh water requirement from DIAL water shall not exceed 552 KLD.
- (vii) A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed, the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for ground water and surface water sources, ensuring that there is no impact on other users.
- (viii) The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.
- (ix) At least 20% of the open spaces as required by the local building bye-laws shall be pervious. Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as pervious surface.
- (x) Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.
- (xi) Use of water saving devices/ fixtures (viz. low flow flushing systems; use of low flow faucets tap aerators etc) for water conservation shall be incorporated in the building plan.

- (xii) Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.
- (xiii) Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.
- (xiv) The local bye-law provisions on rain water harvesting should be followed. If local bye-law provision is not available, adequate provision for storage and recharge should be followed as per the Ministry of Urban Development Model Building Byelaws, 2016. As proposed 2nos. of rain water harvesting recharge pits shall be provided for rain water harvesting after filtration as per CGWB guidelines.
- (xv) As proposed, no ground water shall be used during construction/ operation phase of the project.
- (xvi) Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering.

Solid Waste Management

- (xvii) The provisions of the Solid Waste (Management) Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste (Management) Rules, 2016 shall be followed.
- (xviii) Disposal of muck during construction phase shall not create any adverse effect on the neighboring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
- (xix) Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials. Wet garbage shall be composted in Organic Waste Converter. Adequate area shall be provided for solid waste management within the premises which will include area for segregation, composting. The inert waste from project will be sent to dumping site.
- (xx) Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.
- (xxi) A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained.

Sewage Treatment Plant

- (xxii) Sewage shall be treated in the STP based on MBBR Technology with tertiary treatment i.e. Ultra Filtration. The treated effluent from STP shall be recycled/re-used for flushing, gardening, wet scrubber and cooling. As proposed no treated water shall be discharged to municipal drain.
- (xxiii) No sewage or untreated effluent water would be discharged through storm water drains.

- (xxiv) The installation of the Sewage Treatment Plant (STP) shall be certified by an independent expert and a report in this regard shall be submitted to the Ministry before the project is commissioned for operation. Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the odour problem from STP.
- (xxv) Sludge from the onsite sewage treatment, including septic tanks, shall be collected, conveyed and disposed as per the Ministry of Urban Development, Central Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.
- (xxvi) The project proponents would devise a monitoring plan to the satisfaction of the State Pollution Control Board so as to continuously monitor the treated waste water being used for flushing in terms of faecal coliforms and other pathogenic bacteria.
- (xxvii) The project proponents would commission a third party study on the implementation of conditions related to quality and quantity of recycle and reuse of treated water, efficiency of treatment systems, quality of treated water being supplied for flushing (specially the bacterial counts), comparative bacteriological studies from toilet seats using recycled treated waters and fresh waters for flushing, and quality of water being supplied through spray faucets attached to toilet seats.

Energy

- (xxviii) Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency shall be ensured. Buildings in the States which have notified their own ECBC, shall comply with the State ECBC. Outdoor and common area lighting shall be LED. Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof u-values shall be as per ECBC specifications.
- (xxix) Energy conservation measures like installation of CFLs/ LED for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning. Used CFLs, TFL and LED shall be properly collected and disposed off/sent for recycling as per the prevailing guidelines/rules of the regulatory authority to avoid mercury contamination.
- (xxx) Solar, wind or other Renewable Energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level/ local building bye-laws requirement, whichever is higher. Follow super ECBC requirement of ECBC 2017 and provide compliance report.
- (xxxi) Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also

Kau

recommended to meet its hot water demand from solar water heaters, as far as possible.

- (xxxii) Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include Fly Ash bricks, hollow bricks, AACs, Fly Ash Lime Gypsum blocks, Compressed earth blocks, and other environment friendly materials. Fly ash should be used as building material in the construction as per the provision of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016. Ready mixed concrete must be used in building construction.
- (xxxiii) A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project shall be obtained.
- (xxxiv) The project proponents will use gas based power generating standby systems.

Air Quality and Noise

- (xxxv) Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site. These measures shall include screens for the building under construction, continuous dust/ wind breaking walls all around the site (at least 3 meter height). Plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murram and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site. Sand, murram, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution. Wet jet shall be provided for grinding and stone cutting. Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust.
- (xxxvi) Notification GSR 94(E) dated 25.01.2018 of MoEF&CC regarding Mandatory Implementation of Dust Mitigation Measures for Construction and Demolition Activities for projects requiring Environmental Clearance shall be complied with.
- (xxxvii) All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Rules, 2016. All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.
- (xxxviii) The gaseous emissions from generator set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the generator sets to mitigate the noise pollution. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms.
- (xxxix) For indoor air quality the ventilation provisions as per National Building Code of India.

- (xi) Ambient noise levels shall conform to commercial standard both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB / SPCB.

Green Cover

- (xli) A minimum of 1 tree for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping. As proposed 8,102.49 sqm area shall be provided for green area development.

Top Soil preservation and Reuse

- (xlii) Topsoil should be stripped to a depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site.

Transport

- (xliii) A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public, and private networks. Road should be designed with due consideration for environment, and safety of users. The road system can be designed with these basic criteria.
- Hierarchy of roads with proper segregation of vehicular and pedestrian traffic.
 - Traffic calming measures
 - Proper design of entry and exit points.
 - Parking norms as per local regulation
- (xliv) Traffic Study Report as prepared and submitted in accordance with CRRI's recommendations shall be implemented in letter and spirit. Further, a detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habitation being carried out or proposed to be carried out by the project or other agencies in this 05 Kms radius of the site in different scenarios of space and time and the traffic management plan shall be duly validated and certified by the State Urban Development department and the P.W.D./ competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments.
- (xlv) Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours.

Environment management Plan

- (xlvi) An environmental management plan (EMP) as prepared and submitted along with EIA/EMP Report shall be implemented to ensure compliance with the environmental conditions specified above. A dedicated Environment Monitoring Cell with defined functions and responsibility shall be put in place to implement the EMP. The environmental cell shall ensure that the environment infrastructure like Sewage Treatment Plant, Landscaping, Rain Water Harvesting, Energy efficiency and conservation, water efficiency and conservation, solid waste management, renewable energy etc. are kept operational and meet the required standards. The environmental cell shall also keep the record of environment monitoring and those related to the environment infrastructure.

Others

- (xlvii) Provisions shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
- (xlviii) A First Aid Room shall be provided in the project both during construction and operations of the project.
- (xlix) The company shall draw up and implement corporate social Responsibility plan as per the Company's Act of 2013.
- (l) As per the Ministry's Office Memorandum F.No. 22-65/2017-IA.III dated 1st May 2018, and proposed by the project proponent, an amount @0.25% of project Cost shall be earmarked under Corporate Environment Responsibility (CER) for the activities such as infrastructure creation for drinking water supply, sanitation, health, education, skill development, roads, cross drains, electrification including solar power, solid waste management facilities, scientific support and awareness to local farmers to increase yield of crop and fodder, rain water harvesting, soil moisture conservation works, avenue plantation, plantation in community areas. The activities proposed under CER shall be restricted to the affected area around the project. The entire activities proposed under the CER shall be treated as project and shall be monitored. The monitoring report shall be submitted to the regional office as a part of half yearly compliance report, and to the District Collector. It should be posted on the website of the project proponent.

PART B - GENERAL CONDITIONS

- (i) The funds earmarked for environmental protection measures shall be kept in separate account and shall not be diverted for other purpose. Year-wise expenditure shall be reported to this Ministry and its concerned Regional Office.
- (ii) Officials from the Regional Office of MoEF&CC, Lucknow who would be monitoring the implementation of environmental safeguards should be given full cooperation, facilities and documents/data by the project proponents during their inspection. A complete set of all the documents submitted to

- MoEF&CC shall be forwarded to the APCCF, Regional Office of MoEF&CC, Lucknow.
- (iii) In the case of any change(s) in the scope of the project, the project would require a fresh appraisal by this Ministry.
 - (iv) The Ministry reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the environment clearance under the provisions of the Environmental (Protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.
 - (v) All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department, the Forest Conservation Act, 1980 and the Wildlife (Protection) Act, 1972 etc. shall be obtained, as applicable by project proponents from the respective competent authorities.
 - (vi) These stipulations would be enforced among others under the provisions of the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act 1981, the Environment (Protection) Act, 1986, the Public Liability (Insurance) Act, 1991 and the EIA Notification, 2006.
 - (vii) The project proponent shall advertise in at least two local Newspapers widely circulated in the region, one of which shall be in the vernacular language informing that the project has been accorded Environmental Clearance and copies of clearance letters are available with the State Pollution Control Board and may also be seen on the website of the Ministry of Environment, Forest and Climate Change at <http://www.envfor.nic.in>. The advertisement shall be made within Seven days from the date of receipt of the Clearance letter and a copy of the same shall be forwarded to the Regional Office of this Ministry at Lucknow.
 - (viii) A copy of the clearance letter shall be sent by the proponent to concerned Panchayat, Zilla Parishad/Municipal Corporation, Urban Local Body and the Local NGO, if any, from whom suggestions/ representations, if any, were received while processing the proposal. The clearance letter shall also be put on the website of the company by the proponent. The EC letter shall also be displayed at the Regional Office, District Industries Centre and Collector's Office/ Tehsildar's office for 30 days.
 - (ix) Any appeal against this clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
 - (x) The proponent shall upload the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the Regional Office of MoEF&CC, the respective Zonal Office of CPCB and the SPCB. The criteria pollutant levels namely; PM_{2.5}, PM₁₀, SO₂, NO_x (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the project shall be monitored and displayed at a convenient location near the main gate of the company in the public domain.
 - (xi) The environmental statement for each financial year ending 31st March in Form-V as is mandated to be submitted by the project proponent to the

concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of EC conditions and shall also be sent to the respective Regional Offices of MoEF&CC by e-mail.

6. This issues with the approval of the Competent Authority.
